

前端门户系统

访问：<http://edufront.lagou.com/>

用户名：15510792995 密码：111111

- 页面不需要我们自己开发，使用提供的页面即可
- 运行项目 `npm run serve`

1、首页显示全部课程

- Index.vue

```
<script>
import Header from "../Header/Header"; // 顶部登录条
import Footer from "../Footer/index"; // 顶部登录条
export default {
  name: "Index",
  components: {
    Header,
    Footer,
  },
  data() {
    return {
      courseList: [], // 课程集合
      activeName: "allLesson",
    };
  },
  created() {
    this.getCourseList(); // 当组件创建完成，调用获取课程方法
  },
  methods: {
    changeCourseTab(tabName) {
      this.classSelect = tabName;
      sessionStorage && sessionStorage.setItem("courseTab", tabName);
    },
    gotoDetail() {
      this.$router.push({ name: "Course", params: { courseid: 1 } });
    },
    getCourseList() {
      return this.axios
        .get("http://localhost:8002/course/getAllCourse")
        .then((result) => {
          console.log(result);
          this.courseList = result.data; // 将返回的数据 赋值给 当前组件中的集合
        })
        .catch((error) => {
          console.log(error);
          this.$message.error("获取数据失败!");
        });
    },
  },
}
```

```
    },  
  };  
</script>
```

```
<!-- 课程信息展示开始 -->  
<li class="course-li" v-for="(item,index) in courseList" :key="index">

<!-- 课程信息结束 -->

```

2、登录

```

<script>
export default {
  name: "Header",

  props: {},
  data() {
    return {
      isLogin: false, // 登录状态, true: 已登录, false: 未登录
      userDTO: null, // 用来保存登录的用户信息
      isNewMessage: false, // 是否有新的推送消息
      dialogFormVisible: false, // 是否显示登录框, true: 显示, false: 隐藏
      phone: "", // 双向绑定表单 手机号
      password: "", // 双向绑定表单 密码
    };
  },
  computed: {
  },
  watch: {
  },
  mounted() {
  },
  created() {
    // 当刷新页面, 组件创建成功之后, 立刻检测本地储存中是否存在用户对象
    this.userDTO = JSON.parse( localStorage.getItem("user") );
    if(this.userDTO != null){
      this.isLogin = true; // 已登录
    }
  },
  methods: {
    goToSetting() {
      this.$router.push("/setting"); // 跳转个人设置页面
    },
  },

```

```

goToLogin() {
  this.dialogFormVisible = true; // 显示登录框
},
login(){ // 前去登录
  return this.axios
    .get("http://localhost:8002/user/login" , {
      params:{
        phone:this.phone,
        password:this.password
      }
    })
    .then( (result)=>{
      console.log( result );
      this.dialogFormVisible = false ; //关闭登录框
      this.userDTO = result.data; // 保存返回数据中的用户对象信息
      this.isLogin = true; // 更新登录状态
      localStorage.setItem("user", JSON.stringify(this.userDTO)); // 将登录成功
        的对象信息保存到本地储存中
    } )
    .catch( (error)=>{
      this.$message.error("登录失败! ");
    });
},
goToLoginwx() {
  alert("微信登录");
},
toToIndex() {
  this.$router.push("/"); //回到首页
},
toToNotic(){
},
logout(){ //登出
  localStorage.setItem("user", null); // 将登录成功的对象信息保存到本地储存中
  this.isLogin = false; // 更新登录状态
  alert('谢谢使用，再见! ');
}
},
};
</script>

```

3、已购课程

```

<script>
import Header from "../Header/Header"; //顶部登录条
import Footer from "../Footer/index"; //顶部登录条
export default {
  name: "Index",
  components: {
    Header,
    Footer,
  },
  data() {
    return {
      activeName: "allLesson",

```

```

        courseList:[], // 课程集合
        myCourseList:[], // 已登录用户购买的课程集合
        user:null, // 登录的用户对象
        isLogin:false // 登录状态
    };
},
created() {
    this.getCourseList(); //当组件创建完毕，就调用获取课程的方法
    this.user = JSON.parse( localStorage.getItem("user") );
    if(this.user != null){
        this.getCourseByUserId(); //查询已经用户购买过的课程列表
        this.isLogin = true; // 改变登录状态
    }
},
methods: {
    changeCourseTab(tabName) {
        this.classSelect = tabName;
        sessionStorage && sessionStorage.setItem("courseTab", tabName);
    },
    gotoDetail() {
        this.$router.push({ name: "Course", params: { courseid: 1 } });
    },
    getCourseList(){ // 去dubbo服务获取全部课程的数据
        return this.axios
            .get("http://localhost:8002/course/getAllCourse")
            .then((result) => {
                console.log(result);
                this.courseList = result.data;
            }).catch( (error)=>{
                this.$message.error("获取课程信息失败！");
            } );
    },
    getCourseByUserId(){
        return this.axios
            .get("http://localhost:8002/course/getCourseByUserId/"+this.user.content.id)
            .then((result) => {
                console.log( result); //购买的
                this.myCourseList = result.data;
            }).catch( (error)=>{
                this.$message.error("获取课程信息失败！");
            } );
    }
},
};
</script>

```

```

<el-tab-pane label="已购" name="hasPay">
    <div v-if="!isLogin">
        
        <div class="no-data-title">您还没有登录</div>
        <div class="no-data-title">登录后即可查看已购课程</div>
        <div class="btn btn-yellow btn-center">立即登录</div>
    </div>
    <div v-if="isLogin">
        <ul class="course-ul-pc">
            <!-- 已购买的课程信息展示开始 -->

```

```
        <li>...省略...</li>
      <!-- 已购买的课程信息结束 -->
    </ul>
  </div>
</el-tab-pane>
```

4、课程详情-基本信息

Index.vue

```
<div @click="gotoDetail(item)">
  <span>
    {{item.courseName}}
  </span>
</div>

<script>
  gotoDetail(item) {
    // 将课程对象传递到课程详情组件
    this.$router.push({ name: "Course", params: { course: item } });
  }
</script>
```

Course.vue

```
<script>
data() {
  return {
    activeName: "intro",
    course:null
  };
},
created(){
  this.course = this.$route.params.course; // 从路由中获得参数对象赋值给本组件的参数
}
</script>
```

```

<div class="content-wrap">
  <div class="name" style="text-align:left;">
    {{course.courseName}}
  </div>
  <div class="des text-omit" style="text-align:left;">
    {{course.brief}}
  </div>
  <div class="title">
    <div class="teacher-name text-omit">
      讲师: {{course.teacher.teacherName}}
```

```

    <span class="line"></span>
    {{course.teacher.position}}
  </div>
</div>
<div class="lesson-info">
  <div class="book-icon background-img-set"></div>
  <div class="time">100 讲 / {{course.totalDuration}} 课时</div>
  <div class="person-icon background-img-set"></div>
  <div class="person">{{course.sales}}人已购买</div>
</div>
</div>

```

5、课程详情-共计多少讲

```

<div class="time">{{totalLessons}} 讲 / {{course.totalDuration}} 课时</div>

```

```

<script>
data() {
  return {
    activeName: "intro",
    course:null,
    totalLessons:0, // 本门课程的总节数(多少讲)
  };
},
created(){
  this.course = this.$route.params.course; // 从路由中获得参数对象赋值给本组件的参数

  // 计算多少节课要讲
  let x = 0;
  for(let i = 0; i< this.course.courseSections.length; i++){
    let section = this.course.courseSections[i]; //每一章
    for( let j = 0; j<section.courseLessons.length ; j++){
      x++;
    }
  }
  this.totalLessons = x;
}
</script>

```

6、课程详情-实现课程信息描述

html不识别数据库的html标签，必须使用v-html才可以

```

<el-tab-pane label="课程信息" name="intro">
  <div v-html="course.courseDescription" class="content-p pc-background">
</div>

```

7、课程详情-显示章节目录

```
<el-tab-pane label="目录" name="directory">
  <div class="class-menu-container list-page-container more-sections more-
sections-padding">
    <!-- 章 开始 -->
    <div v-for="section in course.courseSections" >
      <div class="section-name single-line">
        {{section.sectionName}}
      </div>
      <div class="class-menu-block">
        <!-- 每节课 开始 -->
        <div
          class="class-level-one over-ellipsis"
          @click="watchCourse(1)"
          v-for="(lesson , index) in section.courseLessons" :key="index">
          <div class="text-wrap">
            <div class="content">{{lesson.theme}}</div>
            <div class="item-status-wrap item-status-wrap-list">
              <div class="item-status test-watch">试看</div>
            </div>
          </div>
        </div>
        <!-- 每节课 结束 -->
      </div>
    </div>
    <!-- 章 结束 -->
  </div>
</el-tab-pane>
```

8、课程详情-显示全部留言

```
<script>
data() {
  return {
    activeName: "intro",
    course:null,
    totalLessons:0, // 本门课程的总节数
    commentList:null, // 所有留言
  };
},
created(){
  this.course = this.$route.params.course; // 从路由中获得参数对象赋值给本组件的参数

  // 计算多少节课要讲
  let x = 0;
  for(let i = 0; i< this.course.courseSections.length; i++){
    let section = this.course.courseSections[i]; //每一章
    for( let j = 0; j<section.courseLessons.length ; j++){
      x++;
    }
  }
}
```

```

    }
    this.totalLessons = x;

    // 获得所有留言
    this.getComment();

  },
  methods: {
    //播放视频
    watchCourse(index) {
      alert("观看第【" + index + "】节课程视频!");
    },
    buy(courseid) {
      alert("购买第【" + courseid + "】门课程成功，加油!");
    },
    getComment(){
      return this.axios

.get("http://localhost:8002/course/comment/getCourseCommentList/"+this.course.id
+"/1/20")
      .then((result) => {
        //console.log(result);
        this.commentList = result.data;
      }).catch( (error)=>{
        this.$message.error("获取留言信息失败!");
      } );
    }
  }
}
</script>

```

```

<!-- 留言板 开始-->
<div class="message">
  <div class="message-topic">
    <div class="message-topic-title normal-font">精选留言</div>
  </div>
  <div>
    <div class="message-edit">
      <textarea rows="20" style="border:0px;resize: none;"
        contenteditable="true"
        placeholder="分享学习心得、思考感悟或者给自己一个小鼓励吧！"
        class="edit-div pcStyle">

9、课程详情-章节状态

```

<script>
import Header from "../Header/Header"; //顶部登录条
import Footer from "../Footer/index"; //顶部登录条
export default {
  name: "Course",
  components: {
    Header,
    Footer,
  },
  data() {
    return {
      activeName: "intro",
      course:null,
      totalLessons:0, // 本门课程的总节数
      commentList:null, // 所有留言
      isLogin:false, // false 未登录
      myCourseList:[], // 我购买过的课程列表
      isBuy:false, // false 未购买
      user:null, // 登录的用户
    };
  },
  created(){

```

数
this.course = this.\$route.params.course; // 从路由中获得参数对象赋值给本组件的参数

```
// 检测是否登录
this.user = JSON.parse( localStorage.getItem("user") );
if( this.user != null ){
    this.isLogin = true; // 已登录
    this.getMyCourseList(); // 调用查询我购买的课程方法
}

// 计算多少节课要讲，略。。。
// 获得所有留言，略。。。
},
methods: {
    //章节，课程索引，文件播放地址
    watchCourse(i,index,file) {
        if(i==1 && (index==0||index==1)){
            alert("观看第【" + index + "】节课课程视频! "+file);
            this.$router.push({name: "videoDetail",params: { file: file }});
        }else{

      <!--已登录，未购买，锁-->
      <div v-if="isLogin && !isBuy" class="item-status lock"></div>
    </div>
  </div>
</div>
<!-- 每节课 结束 -->
</div>
</div>
<!-- 其余章 结束 -->
</div>
</el-tab-pane>

```

10、在课程详情页点击视频播放

Course.vue

```

<div
  class="class-level-one over-ellipsis"
  @click="watchCourse(2,lesson.id,index,lesson.courseMedia)"
  v-for="(lesson , index) in section.courseLessons" :key="index">
<script>
  //播放视频 （ 章节，小节课编号，每节课的索引，每节课的视频对象）
  watchCourse(status,lessonid,index,media) {
    this.$router.push({ name: "videoDetail", params: { course: this.course ,
    lessonid:lessonid } });
  }
</script>

```

videoDetail.vue

```

<script>
data() {
  return {
    myvideo: null, // 播放器对象
    isplay: false, //是否在播放
    nowTime: "00:00", //当前播放时间
    totalTime: "00:00", //总时长
    course:null, // 课程
    lessonid:0, // 当前播放视频的课节id
  };
},
computed: {},
created() {

```

```

// 判断登录(暂无)

this.course = this.$route.params.course;
this.lessonid = this.$route.params.lessonid; // 点击的视频编号
},
mounted() {
  this.myvideo = document.getElementById("myvideo");
  this.initplay(); // 通过id找到点击视频的地址并播放
},
methods:{
  // 初始化时播放的视频
  initplay(){
    //1.在课程信息中查找即将播放的小节视频的编号
    for( let i = 0 ; i< this.course.courseSections.length;i++){
      let section = this.course.courseSections[i];
      for(let j = 0; j<section.courseLessons.length ; j++){
        let lesson = section.courseLessons[j]; // 每节课
        if(lesson.courseMedia!=null){
          if(this.lessonid == lesson.courseMedia.lessonId){
            console.log("视频地址: " + lesson.courseMedia.fileEdk);
            //2.将小节视频的地址 赋值 给播放器, 进行播放
            this.myvideo.src = lesson.courseMedia.fileEdk;
            return;
          }
        }
      }
    }
  }
}
}
}
}
}
</script>

```

11、播放页的信息显示

```

<script>
export default {
  name: "videoDetail",
  components: {},
  data() {
    return {
      myvideo: null, // 播放器对象
      isplay: false, //是否在播放
      nowTime: "00:00", //当前播放时间
      totalTime: "00:00", //总时长
      course:null, // 课程
      lessonid:0, // 当前播放视频的课节id
      lessonName:null, // 当前播放的视频名称
      isLogin:false, // false 未登录
      isBuy:false, // false 未购买
    };
  },
  computed: {},
  created() {
    // 判断登录(暂无)
    this.user = JSON.parse(localStorage.getItem("user"));
  }
}

```

```

    if(this.user != null){
        this.isLogin = true; // 已登录
    }

    // 从上一级页面的请求中获得课程对象和小节编号
    this.course = this.$route.params.course;
    this.lessonid = this.$route.params.lessonid;
    this.isBuy = this.$route.params.isBuy;
},
mounted() {
    this.myvideo = document.getElementById("myvideo");
    this.initplay(); // 初始化播放的视频
},
methods: {
    play() {
        this.isplay = !this.isplay;
        if (this.isplay) {
            this.myvideo.play();
        } else {
            this.myvideo.pause();
        }
    },
    // 获取视频的时间是秒为单位，格式化城00: 00的格式
    formatTime(time) {
        let mm = Math.floor((time % 3600) / 60);
        let ss = Math.floor(time % 60);
        mm = mm < 10 ? "0" + mm : mm;
        ss = ss < 10 ? "0" + ss : ss;
        return `${mm}:${ss}`;
    },
    //获取初始化信息
    getInit() {
        if (!this.myvideo) {
            //获取失败，显示0
            this.totalTime = this.formatTime(0);
        } else {
            //获取视频总时长
            this.totalTime = this.formatTime(this.myvideo.duration);
        }
    },
    //播放时显示当前播放时间和总时长
    handlerNowTime() {
        if (!this.myvideo) {
            this.nowTime = `${this.formatTime(0)}`;
        }
        this.nowTime = this.formatTime(this.myvideo.currentTime || 0);
    },
    //返回
    goBack() {
        //this.$router.push({ name: "Course" });
        this.$router.go(-1);
    },
    //播放课程
    playLesson(mp4) {
        //alert("播放视频! " + mp4);
        //this.myvideo.src = mp4;
    },
    // 初始化时播放的视频

```

```

initplay(){
  //1.在课程信息中查找即将播放的小节视频的编号
  for( let i = 0 ; i< this.course.courseSections.length;i++ ){
    let section = this.course.courseSections[i];
    for(let j = 0; j<section.courseLessons.length ; j++){
      let lesson = section.courseLessons[j]; // 每节课
      if(lesson.courseMedia!=null){
        if(this.lessonid == lesson.courseMedia.lessonId){
          console.log("视频地址: " + lesson.courseMedia.fileEdk);
          this.lessonName = lesson.theme;
          //2.将小节视频的地址 赋值 给播放器，进行播放
          this.myvideo.src = lesson.courseMedia.fileEdk;
          return;
        }
      }
    }
  }
}
};
</script>

```

```

<div class="content-container">

  <!-- 第一章 开始 -->
  <div v-for="section in course.courseSections.slice(0,1)">
    <div class="content-label">
      <div class="content-label-title single-line">{{section.sectionName}}</div>
      
    </div>

    <!-- 第一章 开始 -->
    <div class="content-sections">
      <div class='content-section'
        v-for="(lesson , index) in section.courseLessons" :key="index">
        <!-- 第一章，前两节 -->
        <div v-if="index<2">
          <div class="section-item clearfix">
            <span class="kw-icon-video section-type-icon"><i class="el-icon-
video-play"></i></span>
            <span class="section-dec">{{lesson.theme}}</span>
            <span class="section-status-icon pause-play">试看</span>
          </div>
          <div class="section-duration">
            <span v-if="lesson.courseMedia != null">时长:
            {{lesson.courseMedia.duration}}</span>
            <span v-else>时长: 无媒体文件</span>
          </div>
        </div>
      </div>
    </div>
  </div>

```

```

        <span v-if="lesson.courseMedia != null">时长:
    {{lesson.courseMedia.duration}}</span>
        <span v-else>时长: 无媒体文件</span>
    </div>
</div>
</div>
</div>
</div>

<!-- 其余章 结束 -->
</div>

```

12、当前播放的视频高亮突出

```

<div class="content-sections">
    <div :class="{
        'content-section': lesson.id != lessonid,
        'content-section content-section-choose': lesson.id == lessonid,
    }"
        v-for="(lesson , index) in section.courseLessons"
        :key="index"
    >
        <div>
            <div class="section-item clearfix">
                <span :class="{
                    'kw-icon-video section-type-icon': lesson.id != lessonid,
                    'kw-icon-video section-type-icon lv': lesson.id == lessonid,
                }"><i class="el-icon-video-play"></i></span>
                <span :class="{
                    'section-dec': lesson.id != lessonid,
                    'section-dec lv': lesson.id == lessonid,
                }">{{lesson.theme}}</span>
                <!-- 未登录 => 锁 -->
                <span v-if="!isLogin" class="section-status-icon pause-play">未解锁
            </span>
                <!-- 已登录, 未购买 => 锁 -->
                <span v-else-if="isLogin && !isBuy" class="section-status-icon pause-
            play">未解锁</span>
                <!-- 已登录, 已购买 => 播放 -->
                <span v-else-if="lesson.id != lessonid" class="section-status-icon
            pause-play">播放</span>
                <span v-else-if="lesson.id == lessonid" class="section-status-icon
            pause-play"></span>
            </div>
            <div class="section-duration">
                <span v-if="lesson.courseMedia != null">时长:
    {{lesson.courseMedia.duration}}</span>
                <span v-else>时长: 无媒体文件</span>
            </div>
        </div>
    </div>
</div>
</div>

```

13、点击课标题切换视频并播放

```
<div :class="{
  'content-section': lesson.id != lessonid,
  'content-section content-section-choose': lesson.id == lessonid,
}"
v-for="(lesson , index) in section.courseLessons"
:key="index"
@click="playLesson(lesson)"
>
```

```
<script>
  //播放课程
  playLesson(lesson) {
    this.lessonid = lesson.id;
    this.myvideo.src = lesson.courseMedia.fileEdk;
    this.myvideo.play();
    this.isplay = !this.isplay;
  },
</script>
```

14、留言点赞

14.1 修改dao

```
@Data
@AllArgsConstructor
@NoArgsConstructor
@ToString
public class CourseComment implements Serializable {
  private static final long serialVersionUID = 922554392538715061L;
  // 一条留言: N个点赞
  private List<CourseCommentFavoriteRecord> favoriteRecords ;
```

```
<resultMap type="com.lagou.entity.CourseComment" id="commentMap">
  <result property="id" column="cc_id" jdbcType="OTHER"/>
  <result property="courseId" column="course_id" jdbcType="INTEGER"/>
  <result property="sectionId" column="section_id" jdbcType="INTEGER"/>
  <result property="lessonId" column="lesson_id" jdbcType="INTEGER"/>

    from course_comment cc left join course_comment_favorite_record ccfr
    on cc.id = ccfr.comment_id
    where cc.is_del = 0
    and course_id = #{courseid}
    order by is_top desc , like_count desc , cc.create_time desc
    limit #{offset}, #{pageSize}
</select>

```

```

@Test
public void getComment(){
    List<CourseComment> list = courseCommentDao.getCommentsByCourseId(7, 1, 20);
    for(CourseComment comment : list){
        System.out.println("【"+comment.getUserName()+"】"+"留言: " +
comment.getComment());
        for(CourseCommentFavoriteRecord fr: comment.getFavoriteRecords()){
            System.out.println("--->" + fr.getUserId());
        }
    }
}

```

14.2 修改controller

```

@GetMapping("comment/getCourseCommentList/{courseid}/{pageIndex}/{pageSize}")
public List<CourseComment> getCommentsByCourseId(@PathVariable("courseid")
Integer courseid,@PathVariable("pageIndex") Integer
pageIndex,@PathVariable("pageSize") Integer pageSize){
    int offset = (pageIndex-1)*pageSize;
    List<CourseComment> list = commentService.getCommentsByCourseId(courseid,
offset, pageSize);
    System.out.println("获取第"+courseid+"门课程的留言：共计"+list.size()+"条");
    return list;
}

```

14.3 页面点赞之后的显示样式

```

<!-- 已赞 -->
<div v-if="JSON.stringify(comment.favoriteRecords).indexOf( user.content.id ) >=
0" class="message-list-title-right">
    
    <div class="message-list-title-right-praise">{{comment.likeCount}}</div>
</div>
<!-- 没点过赞 -->
<div v-else class="message-list-title-right">
    
    <div class="message-list-title-right-praise">{{comment.likeCount}}</div>
</div>

```

14.4 页面调用点赞和取消赞

```

<!-- 已赞 -->
<div @click="cancelzan(comment)" v-
if="JSON.stringify(comment.favoriteRecords).indexOf( user.content.id ) >= 0"
class="message-list-title-right">
    
    <div class="message-list-title-right-praise">{{comment.likeCount}}</div>
</div>
<!-- 没点过赞 -->
<div @click="zan(comment)" v-else class="message-list-title-right">
    
    <div class="message-list-title-right-praise">{{comment.likeCount}}</div>
</div>

```

```

<script>
// 点赞
zan(comment){

        order by is_top desc , like_count desc , cc.create_time desc
        limit #{offset}, #{pageSize}
</select>

```

15、发表留言

- Course.vue

```

// 发表留言
saveComment(){
    return this.axios
    .get("http://localhost:80/course/comment/saveCourseComment",{
        params:{
            courseid:this.course.id,
            userid:this.user.content.id,
            username:this.user.content.name,
            comment:this.comment,
        }
    })
    .then((result) => {

```

```

        // console.log(result);
        // 重新获取本门课的全部留言信息
        this.getComment();
    }).catch( (error)=>{
        this.$message.error("发表留言失败! ");
    } );
},

```

- web消费方

```

public interface CommentService {
    /**
     * 保存留言
     * @param comment 留言内容对象
     * @return 受影响的行数
     */
    Integer saveComment(CourseComment comment);
}

```

```

@RestController
@RequestMapping("course")
public class CommentController {
